

FE Technology, Inc.

Manufacturing

Capabilities

FE Technology, Inc.

FE Technology provides services ranging from conceptual design to finished product. Our staff of engineers, CAD and graphics is available to assist you taking your product to production. With our experience and dedication, we can insure that your product gets into production with a minimum of delay and into your hands as a truly quality product, per the schedule we mutually establish.

Due to our years of hands-on experience and clear communication with Far East factories, we are able to assist you in analyzing your design and transferring both your design and design goals to our factory staff. We are able to minimize any misunderstandings or clarify any complexities to insure that there is full and complete understanding between your staff and our factory staff. We can insure that your product and its application environment are fully understood so that its customer usage is not compromised by choice of materials, construction or component limitations.

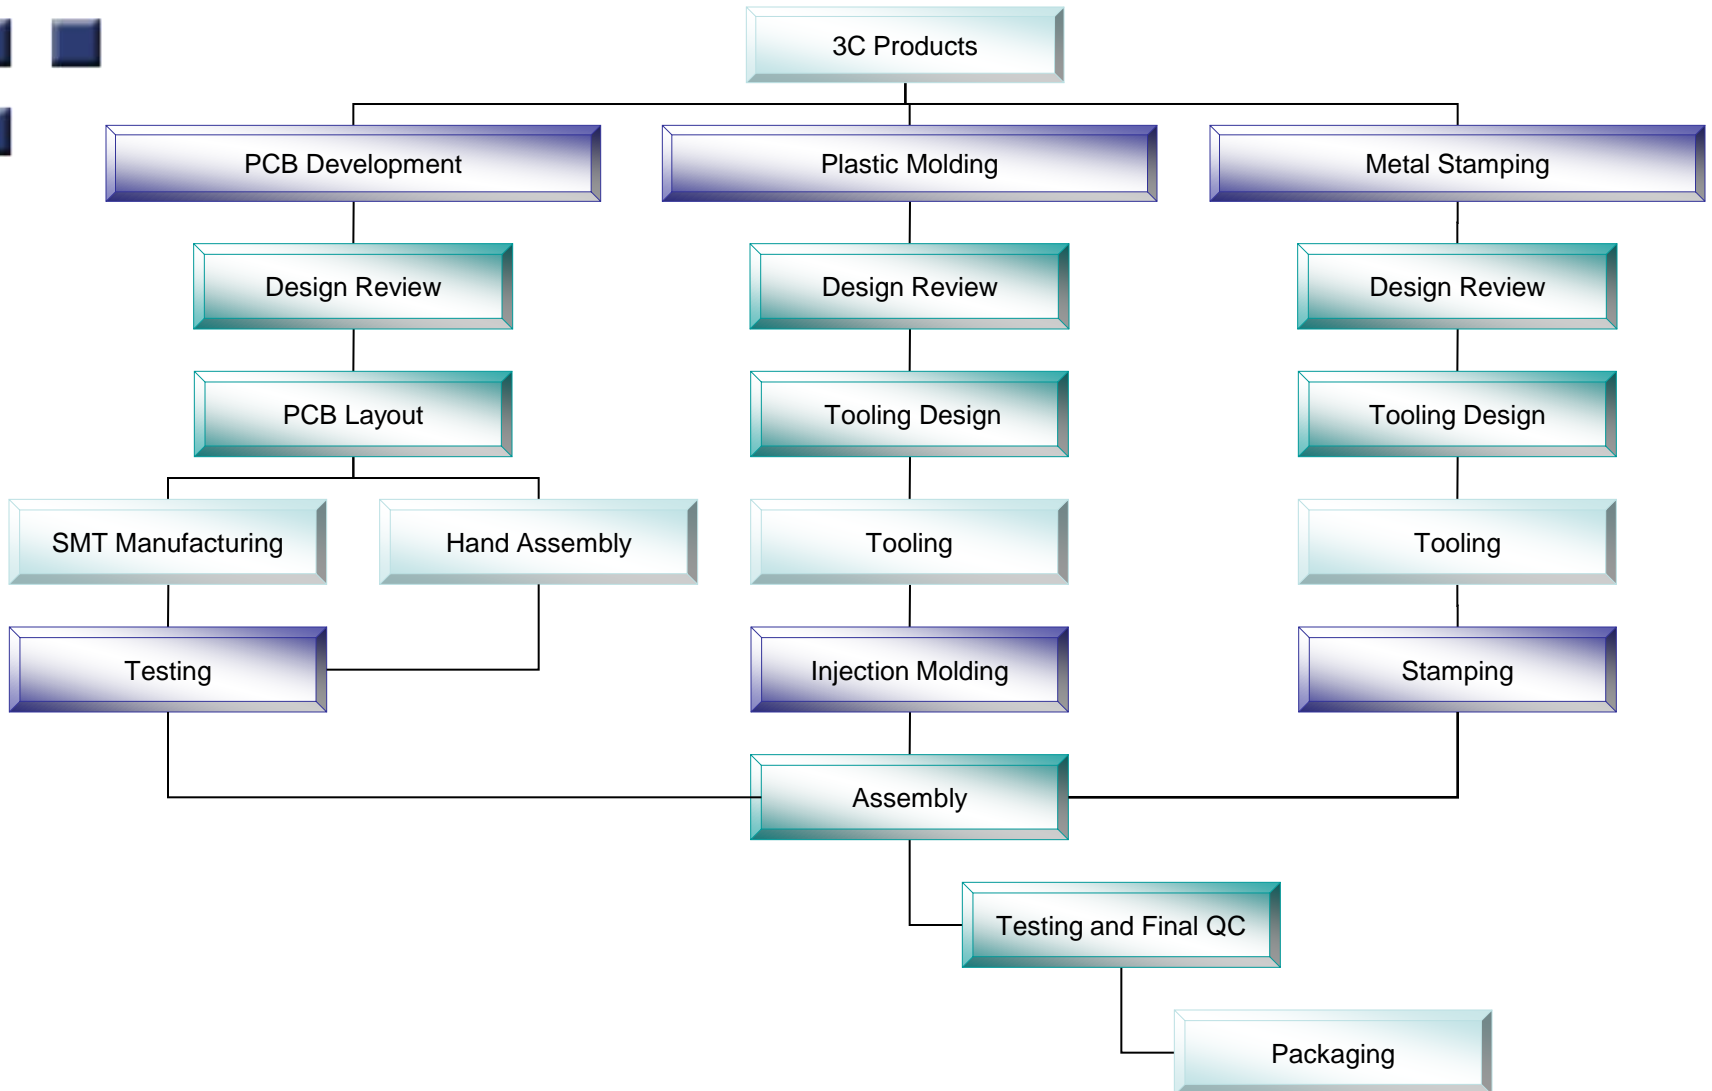

For over 20 years, we have worked with OEM and ODM products, designed by or for customers across the USA. We have worked with long established Fortune 500 companies and new companies trying to get their first products into the marketplace. We have always met the design goals and the quality standards of our customer, no matter how stringent. Our policy is that we are the “manufacturing arm” of our customer and responsive to the needs of your company.

Consider FE Technology as your manufacturing team in the Far East

Production Capabilities

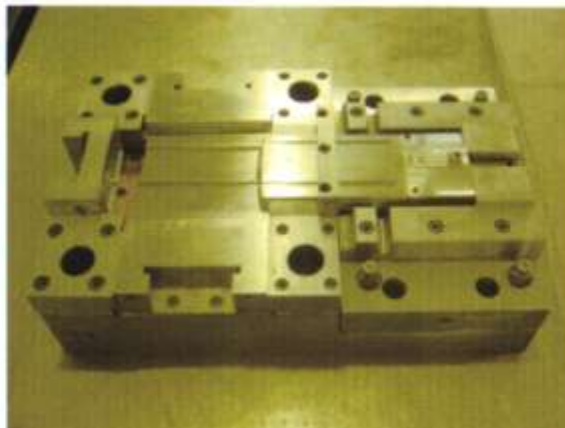

EQUIPMENT

Tooling, Stamping & Molding

Lathe	2		Injection Machine (100 tons)	2
Milling Machine	9		Injection Machine (120 tons)	1
Grinding Machine	6		Injection Machine (130 tons)	2
Drilling Machine	3		Injection Machine (140 tons)	1
Electro-discharge Machine	6		Injection Machine (180 tons)	3
Stamping Machine (8 tons)	2		Injection Machine (250 tons)	3
Stamping Machine (15 tons)	1		Injection Machine (350 tons)	1
Stamping Machine (35 tons)	2		Gloss Meter	1
Stamping Machine (45 tons)	1		Chrome Meter	1
Stamping Machine (110 tons)	1		Light Source	1
Vertical Injection Machine KT400 DM	3		Laser Beam Thermometer	2
Injection Machine (50 tons)	1		Profile Projector PJ300	1
Injection Machine (80 tons)	1		Qm-Measure QM353	1
Injection Machine (90 tons)	1			

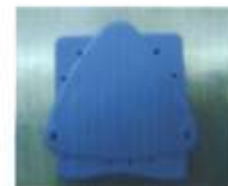

Tooling Design

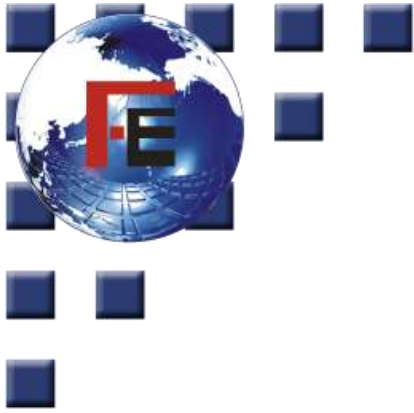

Plastic Injection

Metal Stamping

PCB Equipment

Cooling Dryer	1		Plate conveyer / Feeder	5
Adsorption Dryer	1		Glue Dispenser	2
In-Circuit Tester	2		High Speed Chip Mounter	3
Voltage Regulator	3		Middle Speed Chip Mounter	4
Transformer	2		Multi-Function Chip Mounter	3
Wave Soldering Machine	2		Loader	6
Oscilloscope	2		IR Reflow Machine	6
Programmable Active Loader	2		Auto Screen Printer	4
Solder Past Thickness Gauge	1		Testing Computer	6

SMT Production

Assembly & Testing

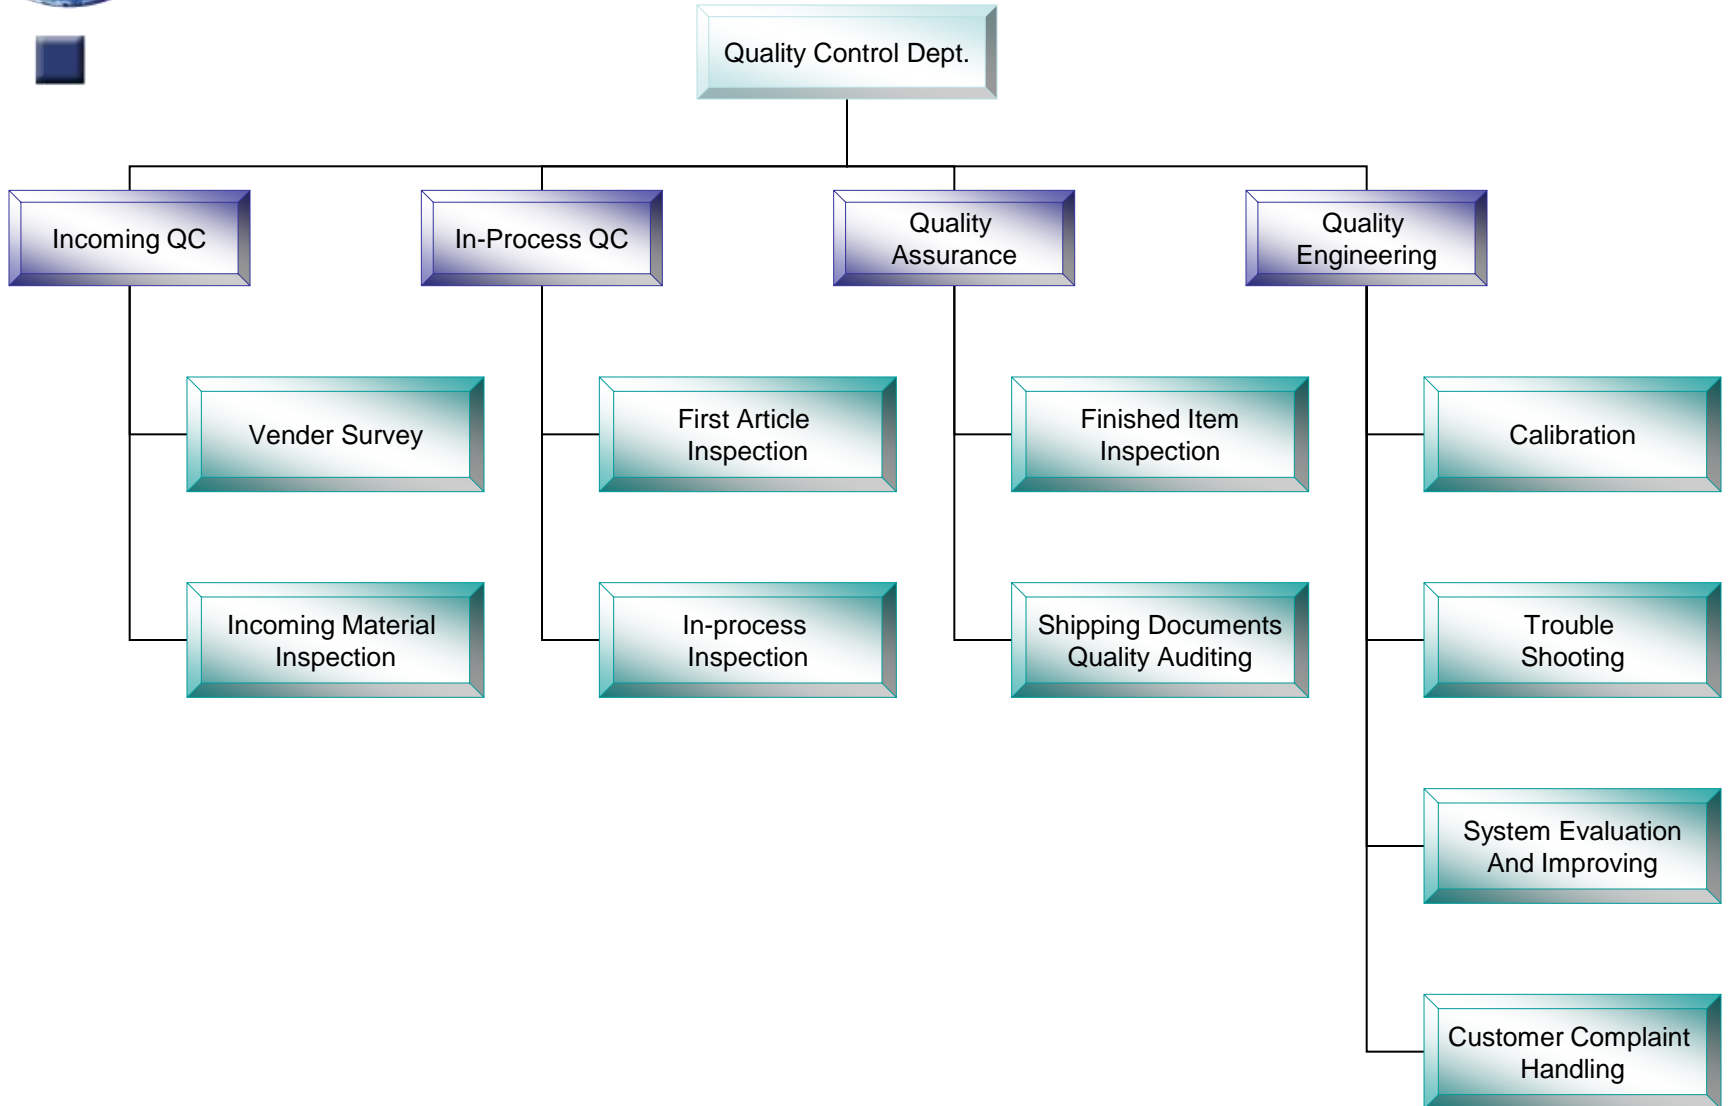

Products

Quality System

FE Technology, Inc.

- Complete Manufacturing Operations
 - High Volume Production
 - PCB Design
 - Mold Design
 - Stamping Design
 - Turnkey Assembly
- Services:
 - Engineering Design
 - OEM Manufacturing
 - Warehousing
 - JIT Shipping
- Contacts
 - Sales and Engineering – Dayton
 - PH: 937.898.9472
 - Corporate Office – California
 - PH: 925.803.1238

Sales & Engineering - Dayton, Ohio

China Manufacture Facility

Corporate Offices – Dublin, California
