## 10 Steps to the World Market

FE Technology receives your designed finished product in our secure storage facilities for quick releases.

FET's 10 step process allows a smooth transition from product design to finished product delivery.

Step 1) Supply us your design, BOM, sample, and/or prototype.

2) Our Ohio based operations /engineering dept. will evaluate and aid designing for pre-production.

3) Confirmation for materials, tooling, and other parameters for your approval.

4) Produce tooling for molds and stamping as required.

5) Pre-production samples are provided for final approval.

6) Packaging Design: Support for full color graphics.

7) Start multi-line production to produce product quickly.

8) Test production parts to confirm specification adherence.

9) Our QA/QC dept. performs final product inspection.

10) Packaging and Shipping to meet customer deadlines.

Testing equipment

**QUALITY:** Our factories are ISO certified to ISO 9001. Our products also meet RoHS standards when required. We maintain complete QA files in our manufacturing facility for IQC, IPQC through to Final QA, to ensure the ongoing quality of our products during their service life. Our factory QA group is prepared to offer standard testing data and special customer testing as required.

*FE Technology* stands by our commitment to provide the best products for your needs. We provide a 1 yr. warranty with all of our production products, standard or custom-built/designed. Our Customers can be assured that FET will keep your production cost down and your supply line running smoothly.

*FET Engineering can help you "Design It" and our factories will "Build It"*
